Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to a “multi-axial machine tool”, classified in class 409, subclass 235.
 - II. Claim 5, drawn to a “mounting and detaching jig for mounting and detaching a table unit”, classified in class 409, subclass 219.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as machining a workpiece, for example, and invention II has separate utility such as lifting or lowering a workpiece, for example. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Jonathan Osha on April 7, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made (Mr. Thomas Sherer contacted the examiner on April 13, 2005 to indicate that it would be better at this time to go ahead and send a written restriction).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3722

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
